

Official Raspberry Pi Zero Case

RPI-020

The Raspberry Pi Zero Case has been designed to fit both the Pi Zero and the Pi Zero W.

The case consists of two parts. It has a standard base featuring a cut-out to allow access to the GPIO, and a choice of three lids: a plain lid, a GPIO lid (allowing access to the GPIO from above), and a camera lid (which, when used with the short camera cable supplied, allows the Raspberry Pi Camera or Camera Noir to be fitted neatly inside it).

Kit includes the following:

- 1 x base
- 3 x lids (plain, GPIO, camera)
- 1 x short camera cable
- 4 x rubber feet
